Carlos Fernández

Threat Detection Engineer · B2B Contractor

Use case development & threat research · SIEM, EDR/XDR & MITRE ATT&CK · Blue Team

Granada, Spain (CET) n4zar1@protonmail.com linkedin.com/in/n4zar1 labs.n4zar1.com

Available now · 100% remote · B2B contractor (own invoicing, EU VAT)

PROFILE

Threat Detection Engineer with 4.5+ years in detection and response, from SOC L1 at a Spanish bank to designing detection use cases across multiple SIEM platforms and customer environments. I design high-quality detections that hold up in production, closing the gap between “we have logs” and “we actually detect the attack”.

- Build and tune detection content mapped to MITRE ATT&CK, prioritised by real threat relevance rather than checkbox coverage.
- Correlate endpoint, network, email and cloud telemetry to catch what single-source rules miss.
- Work directly with SOC teams to cut false positives and speed up triage.
- Turn threat research on real-world campaigns into detections, and detection gaps into research.
- Create hands-on detection engineering training content (TryHackMe, labs.n4zar1.com).

CORE SKILLS

SIEM	IBM QRadar (AQL, full administration), Microsoft Sentinel (KQL), Google SecOps (YARA-L), RSA NetWitness, Splunk (SPL), Elastic; AlienVault and McAfee health monitoring
EDR / XDR	Cortex XDR, CrowdStrike Falcon
Detection engineering	Use case design and tuning, behavioural and IOC-based detections, MITRE ATT&CK mapping and coverage dashboards, false-positive reduction, TTP analysis
Telemetry	Windows Security Events and Sysmon, firewall, proxy, IPS/IDS, email/MTA, AWS, Azure and Office 365
Response	Incident triage and investigation, evidence handling, MISP, sandbox analysis (Cisco AMP, VMRay)
Content	Hands-on labs and training rooms, technical writing, short-form security videos

EXPERIENCE

TryHackMe — Detection Engineering Content Creator

Sep 2026 – Oct 2026 · Remote · Contract

- Created hands-on Detection Engineering training content for the platform.

UST — Threat Detection Engineer

`Jan 2025 – Present · Granada, Spain`

Use Case Management (UCM) team delivering high-fidelity detection content across multiple SIEM platforms and customer environments (logistics, banking).

- Designed custom detection use cases from scratch with a hybrid behavioural and IOC-based approach.
- Built detections in IBM QRadar, Microsoft Sentinel and Google SecOps.
- Correlated Windows (Security Events, Sysmon), network (firewall, proxy), email/MTA and cloud (AWS, Azure, Office 365) telemetry.
- Translated threat research on real-world campaigns and vendor reports into actionable detections.
- Mapped coverage to MITRE ATT&CK at tactic, technique and sub-technique level; identified gaps and built coverage and maturity dashboards.
- Tuned detections with SOC teams to reduce false positives and improve signal quality.

SIA Group — SIEM Administrator, Detect (client: CECABANK)

`May 2024 – Jan 2025 · Granada, Spain`

- Reviewed and created use cases based on known APT behaviour; tracked MITRE ATT&CK coverage.
- Fully administered IBM QRadar for a banking client under PCI DSS.
- Wrote and presented use case briefing papers and SIEM health reports.

SIA Group — SIEM Expert, Protect

`Jan 2024 – May 2024 · Granada, Spain`

- Worked directly with international customers and SIEM vendor support.
- Maintained, upgraded and deployed SIEM tools; fully administered QRadar; created APT-based use cases.
- Monitored AlienVault health and reviewed McAfee SIEM health reports.

ALTEN — SIEM Administrator

`Mar 2023 – Jan 2024 · Granada, Spain`

- Administered RSA NetWitness and Microsoft Sentinel for client environments.
- Created use cases and tracked MITRE ATT&CK coverage, in direct contact with the customer.

Experis España — SIEM Administrator (client: BCC Cajamar)

`Sep 2022 – Mar 2023 · Almería, Spain`

- Integrated log sources into QRadar and built monitoring reports.
- Supported incident response with reporting and evidence collection and preservation.
- Analysed raw firewall, IPS/IDS, MTA and proxy logs.

Experis España — Cybersecurity Analyst, SOC L1 (BCC Cajamar)

`Mar 2022 – Sep 2022 · Almería, Spain`

- Incident Response team for a Spanish bank: investigated QRadar offenses and resolved endpoint incidents in Cortex XDR.
- Analysed email (Cisco IronPort), Netskope, Cisco Firepower and Office 365 compliance alerts.
- Managed MISP/MineMeld lists, Cisco Umbrella block lists and sandbox analysis (Cisco AMP, VMRay).

CERTIFICATIONS

- MITRE ATT&CK Defender (MAD) — ATT&CK Fundamentals
- IBM Learning Path — QRadar SIEM Administrator
- Security Analyst Level 1 (SAL1)
- Introduction to Ethical Hacking

LANGUAGES

- Spanish — native
- English — professional working proficiency
